

Canada

Most PIs are still working up their data from the Beaufort Sea cruise in 2009 (IPY).

PIs have made a number of presentations at meetings, but no publications have appeared as of yet.

Canadian GEOTRACES has funding to organize a workshop on the Canadian GEOTRACES IPY cruise. However, the cruise leaders do not want to hold the meeting before most of the data are in hand (i.e. later this year or early next year).

Prospects for new cruises/research program we are still at a very early stage.
